Code For Good, 2018

Problem Statement

To have a common shared appointment platform where the members of Spastics Society of Karnataka (SSK) and medical professionals can see and track appointments for children with disabilities.

The Objectives include -

- Ability to categorize and view appointments by Date/Day and by Professionals.
- Maintaining beneficiary and medical professional's database including basic details.

Understanding The Problem

Database Maintenance

Having to maintain similar records manually.

Difficult access to the records.

Led to time consuming solutions

Transparency

Records being maintained by certain SSK members.

Scheduling of appointments made difficult.

Made Coordination among members difficult.

Accessibility

Regular updation of appointments wasn't possible.

Cancellation of an appointment from either side would be inconvenient.
